Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, and 11-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Junger et al. [US 2004/0172260].

As per claims 1, 11, 17-20, Junger discloses a communications system comprising: a host system in communication with one or more client systems, the host system having a serialized inventory control system configured to [as illustrated in figure 1 (e.g. block 8)]: receive serialized information [see abstract]; apply validation rules to the serialized information [see paragraph 8]; flag exceptions to the validation rules; and report the exceptions, wherein the serialized inventory control system includes database logic to check that that serialized information does not exist for an entering inventory item and that serialized information does exist for an exiting inventory item [see figures 19-35 and paragraphs 178, 187].

As per claims 2, 3-6, 12-16, , Junger discloses the serialized information comprises an electronic serial number associated with a finished good and a handset [see abstract, paragraphs 28, 31 and 33, and figure 19-22]; and serialized information comprises immigration data [see paragraph 28].

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Junger, and further in view of Yang et al. [US 20010034673].

As per claims 7-10, Junger discloses purchase receipts and returns [see abstract]; an order management module configured to cover manufacturing

processes, sales transactions, and sales returns transactions [see figure 14 (e.g. ***systems management services***), paragraph 160, paragraph 8, and paragraph 10].

Junger does not explicitly disclose an enterprise resource planning system [see paragraph 3]; the enterprise resource planning system comprises an inventory module configured to cover inventory receipt, inventory transfer, inventory activation, and inventory adjustments. However, Yang discloses an enterprise resource planning system; the enterprise resource planning system comprises an inventory module configured to cover inventory receipt [see abstract], inventory transfer [see paragraph 26], inventory activation, and inventory adjustments [see paragraph 33].

Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Junger to include Yang's features mentioned above. Such a modification would provide service parts inventory planning and management for one or more entities in a supply chain includes one or more planner applications [see summary].
